

# Holy Family Outdoor Display Pattern

a gift from Jona Giammalva

Uses a 4x4 piece of plywood. After you have the pattern taped together you can divide the 3 parts at the bottom so you can move them around on your plywood to get the best use of space.

This guide shows the order the papers will go together. Just tape everything at the edges *with no overlapping* and then cut the shapes out

**BEFORE YOU START!**

We opted to add 4" at the bottom of our designs (after we cut the paper pattern pieces out) because we realized the 2x4 was going to hide some of the bottom details (see picture on cover page). You may want to try this.

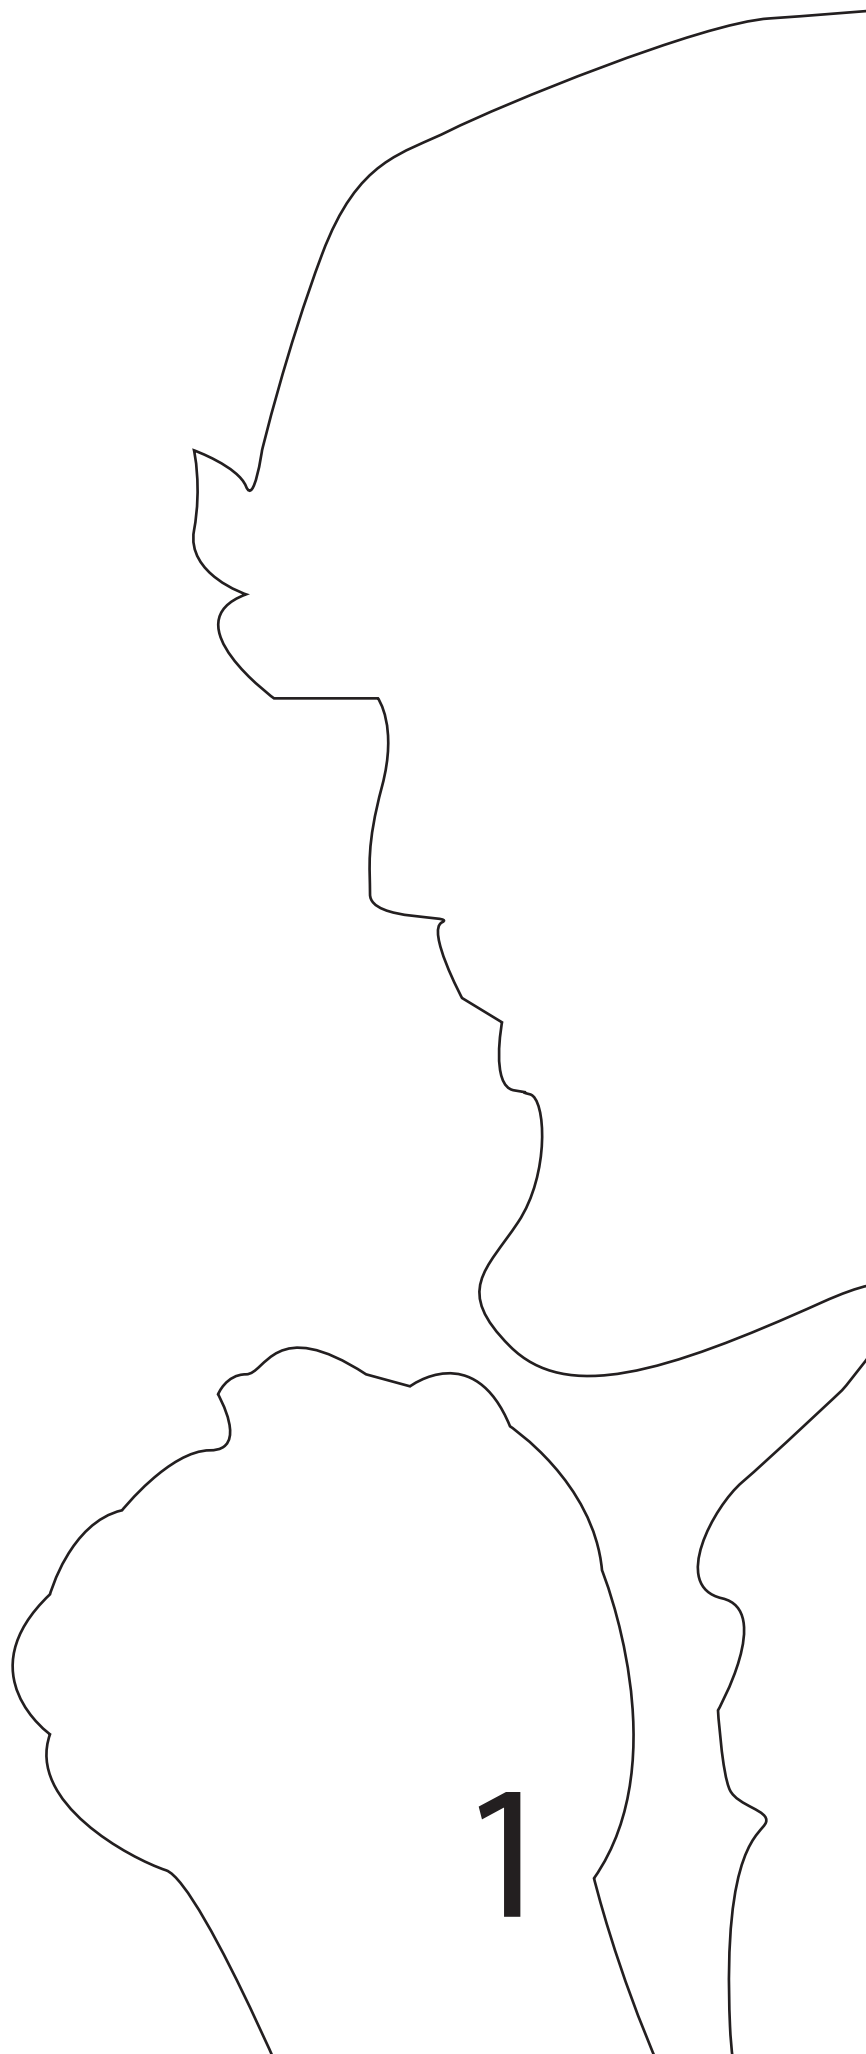

**Cut where the arrows point to  
divide your pieces after you  
tape and cut them.**

**make sure your printer  
is scaled at 100%**
