

## Wise Men Outdoor Display Pattern a gift from Jona Giammalva

Uses a 4x4 piece of plywood. After you have the pattern taped together you can divide the 3 parts at the bottom so you can move them around on your plywood to get the best use of space.

Wise Men Trace  
A silhouette cutout prepared by  
Jona Giammalva 2016

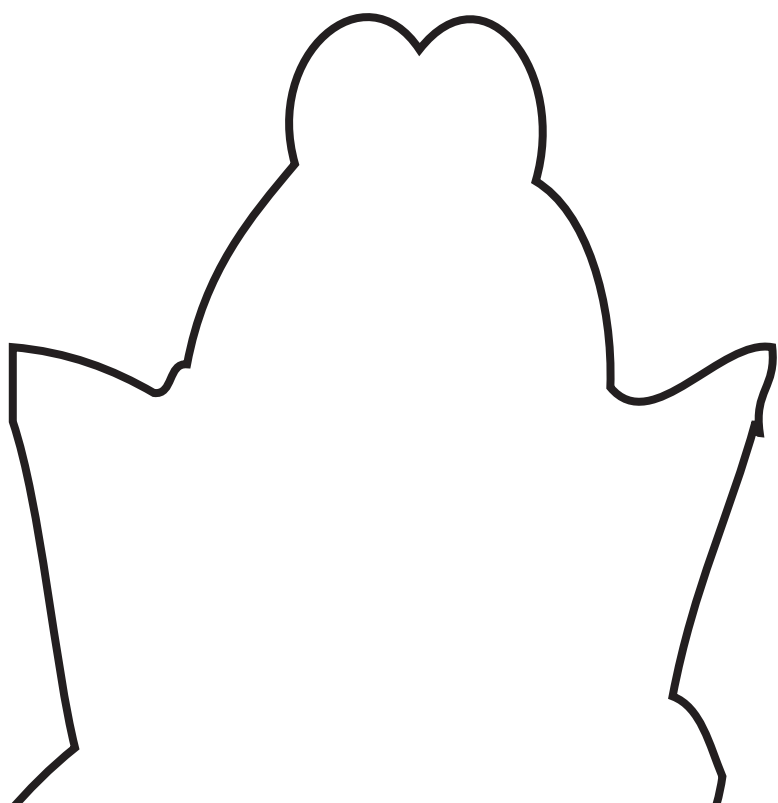

This is designed to fit on a 4 x 4 piece of plywood available at most home improvement centers. Simply print your pattern pieces and tape them together (do not cut them first!). Do not overlap any of the paper sheets, but butt them up next to each other and tape them together (just pencil in any missing lines once it's all taped in place). Use the illustration on this page as an example of how all the pieces fit together. You can either cut your shapes and trace around them onto your board or leave it uncut and use carbon paper to trace the shapes onto the board.  
Merry Christmas!

**Make sure your printer is  
scaled at 100%**
